Ashkan Tofangdar

Senior Full-Stack Engineer · Angular, React, Node.js, Go

ashkan4472@gmail.com +98 922 126 6074 Tehran, Iran ashkan.is-a.dev ashkan-tofangdar ashkan4472

Summary

Full-stack engineer with 9+ years of experience building web and mobile products end to end, from Angular and React interfaces to Node.js, NestJS, Python and Go services. I co-founded a startup and led development of its mobile app to more than 80,000 users, and I have led and mentored small engineering teams along the way. The work I enjoy most is taking a slow or tangled codebase and making it fast, clear and easy for the next developer to pick up.

Experience

Bugloos Tehran, Iran
Senior Front-End Developer 06/2026 – Present

- Lead front-end development and maintain the codebase for Angular applications.
- Work with AI coding tools day to day to ship features and releases faster.
- Keep the apps healthy over time through refactoring, performance work and regular maintenance.

Forbix Tehran, Iran
Senior Front-End Developer 01/2025 – 02/2026

- Rebuilt the whole web app from new UI/UX designs, making navigation simpler and the product easier to use.
- Worked closely with the backend team on API contracts and real-time data.
- Cut API calls with TanStack Query and better state management; with lazy loading and heavy caching, load times for assets, components and API calls dropped by 75%.
- Used TanStack Table and Router for complex routing and data-heavy tables, and built an internal tool for dynamic forms with large field sets and validation on TanStack Form.

BerryOnMars Germany
Senior Full-Stack Developer 06/2023 – 01/2025

- Led development of web apps in Angular, React and Next.js, with performance work that improved the experience by 60%, from developer experience to end-user experience.
- Partnered with UX/UI designers on accessible interfaces and integrated REST APIs across front end and back end.
- Reviewed code, coached teammates, and wrote unit and end-to-end tests to make releases safer.
- Built AI automations that took repetitive work off the team, plus AI-driven features for user-facing products.

Ninipaa 05/2020 – 05/2023
Lead Developer & Co-founder

- Co-founded the company and led development of a mobile app that grew to 80,000+ users.
- Built and ran the custom REST and GraphQL APIs behind the app.
- Introduced Agile practices that cut time-to-market by 20%, and refactored for maintainability.
- Mentored 50+ junior developers and interns on coding standards, debugging and best practices.
- Worked with designers and product managers to ship regular updates based on user feedback and analytics.

Lingoberry 03/2021 – 03/2023
Software Architect

- Designed the multi-tier architecture of a large-scale web application and a shared architecture across a suite of products.
- Set coding standards, wrote architecture documentation, and mentored junior engineers.
- Evaluated and integrated third-party tools to improve efficiency and performance.

SmartX Accelerator 03/2021 – 11/2022
Technical Advisor

- Advised several software projects on technical decisions and helped troubleshoot problems.
- Helped migrate legacy systems to modern platforms and handled server and network configuration.

Bittunes 03/2021 – 02/2022
Software Developer

- Designed and built a modern interface for a large enterprise product.
- Developed REST APIs and web apps with Node.js and React, and helped debug existing applications.

Goals 04/2021 – 01/2022

Mobile Developer

- Built several iOS and Android apps in Flutter, lifting user engagement by 45%.
- Took a feature-rich app from concept to release, working closely with design and product.

Swing 05/2017 – 08/2020

Full-Stack Developer

- Built web apps in Angular, React, SailsJS and NestJS, with Node.js back ends on MongoDB, PostgreSQL, Redis.
- Built REST and GraphQL APIs and real-time features over WebSockets, with UIs in Bulma, Ant Design and Material UI.
- Helped migrate legacy systems to modern architectures, and ran code reviews and testing.

Projects

ESR Machine Development

- Built an embedded ESR (Erythrocyte Sedimentation Rate) blood-test machine of the kind used in hospitals and labs, on ESP32 and Raspberry Pi.
- Created a custom operating system for medical compliance, and used image processing to improve measurement accuracy.

Augmented Reality Web App

- Built an AR web app in plain JavaScript and AR.js: scan a QR code on a visit card to open an AR view of a company's profile.
- Used at international events, including conferences in Dubai.

Technical Skills

Frontend

Languages: TypeScript, JavaScript, HTML5, CSS3/SCSS · **Frameworks:** Angular, React, Next.js, Svelte · **UI:** Tailwind CSS, Material UI, Ant Design · **State and data:** Redux Toolkit, Zustand, TanStack · **Testing:** Jest, Cypress, Playwright, Storybook

Backend

Languages: Node.js, Python, Go · **Frameworks:** NestJS, Express, Django, FastAPI, Gin, Fiber · **APIs:** REST, GraphQL, WebSockets

Databases

PostgreSQL, MySQL, SQL Server, MongoDB, Redis, Firebase / Firestore · data modeling, query optimization, replication

Mobile

Flutter, React Native, native Android

Education

Hamedan University of Technology B.Sc. • 3.8 GPA

Computer Engineering 09/2019 – 01/2024

Shahid Beheshti University B.Sc.

Computer Engineering (guest student) 06/2020 – 05/2021

Four terms as a guest student, completed with honors.

Awards

Best Paper and Presentation Award 06/2023

The Global Interdisciplinary Green Cities Conference, University of Augsburg

Best Paper and Presentation for an abstract on improving the Attention Stand-alone Process Program (ASPP) with Artificial Intelligence.

Sharif MPM 10/2020

Placed 8th with a score of **16.18**, close behind the winner's **16.6**, after three rounds of judging.
