

Ashkan Tofangdar

Software Developer / Full Stack Developer
📍 Tehran / Iran | 📞 +989221266074 | ✉️ ashkan4472@gmail.com

Profiles

[in ashkan-tofangdar](#) [ashkan4472](#)

Summary

Software Developer with **7+ years of experience** designing and developing scalable web and mobile applications. Proficient in **ReactJS, Angular, NestJS, GoLang, Python**, and **Node.js**, with experience building **high-performance platforms for 80,000+ users**. Adept at creating intuitive, user-friendly interfaces and mentoring small development teams. Known for writing clean, maintainable code and improving app performance. Seeking opportunities to contribute full-stack expertise and leadership skills to innovative companies.

Technical Skills

Frontend

- **Programming languages:** HTML5, CSS3/SCSS/Sass, JavaScript (ES6+), TypeScript
- **Frameworks and Libraries:** React.js, Angular, jQuery, Svelte
- **UI/Component Libraries:** MaterialUI (MUI), TailwindCSS, Bulma, Bootstrap, Ant Design
- **Testing and Debugging:** Jest, Cypress, Playwrite, Enzyme
- **State Management:** Redux, Redux Toolkit, Zustand, React Query, Tanstack liberaries
- **Others:** Responsive Design (Mobile-first), Progressive Web Apps (PWAs), Cross-browser compatibility, Figma and XD (for design handoff), Storybook (for UI component documentation)

Backend

- **Programming Languages:** JavaScript / Node.js, Python, Go
- **Frameworks and Libraries:** Express.js, NestJS, Django, Django Rest Framework, FastAPI, Fiber, Gin
- **API Design and Development:** RESTful APIs, GraphQL, gRPC, WebSockets
- **DevOps Skills (Backend Relevant):** Containerization (Docker), Orchestration (Kubernetes), CI/CD Pipelines (Jenkins, GitHub Actions, GitLab CI/CD)
- **Others:** Microservices Architecture, Serverless Computing, Monolithic Architecture, Message Queues

Databases

- **Relational Databases:** MySQL, PostgreSQL, SQLite, Microsoft SQL Server
- **NoSQL Databases:** MongoDB, Cassandra, CouchDB, Redis
- **Cloud Database Services:** Google Cloud Firestore, Firebase Realtime Database
- **Others:** Data Modeling, Indexing and Query Optimization, ACID Compliance, Transactions, Backup and Recovery, Sharding and Replication

Mobile

- **Frameworks and Languages:** Native Android, React Native, Flutter, Apache Cordova, Ionic Framework, NativeScript
- **Tools:** Android Studio, Gradle, Firebase SDKs
- **API Integration:** RESTful APIs, GraphQL, WebSockets
- **Others:** Offline Storage/Sync, Push Notifications, Adaptive UI/Layouts, Mobile-First Design Principles

BerryOnMars

06/2023 - Present

Senior Software Developer / Senior Frontend Developer

01/2025

<https://berryonmars.com>

- Led the development of dynamic web applications using Angular, React, and Next.js, achieving a 60% improvement in user performance and engagement.
- Collaborated with UX/UI designers to create intuitive, user-friendly interfaces that enhance usability and accessibility.
- Implemented RESTful API integrations to ensure seamless front-end and back-end communication.
- Conducted thorough code reviews and provided constructive feedback to maintain high-quality coding standards.
- Optimized web application performance, achieving faster load times and improved scalability.
- Developed unit tests and end-to-end tests, ensuring application reliability and minimizing deployment risks.
- Stayed updated with industry trends to incorporate innovative technologies into project workflows.
- Managed front-end projects, adhering to timelines and delivering high-quality features on schedule.
- Designed and implemented AI systems to automate repetitive tasks, increasing team efficiency and reducing manual workload.
- Developed AI-driven applications to enhance user experiences and introduce intelligent features into web solutions.

Ninipaa

05/2020 - 05/2023

Lead Developer & Co-founder

- Designed and developed a mobile application serving over 80,000 users, driving significant user engagement and satisfaction.
- Built and maintained custom RESTful and GraphQL APIs to support mobile application functionality.
- Implemented Agile methodologies to streamline development processes, reducing time-to-market by 20%.
- Enhanced the application's codebase through systematic refactoring, improving performance and maintainability.
- Provided mentorship to over 50 junior developers and interns, guiding them on coding standards, debugging, and best practices.
- Collaborated with designers, stakeholders, and product managers to ensure alignment with user requirements and business goals.
- Conducted rigorous testing and debugging to ensure the stability and reliability of the mobile application.
- Integrated analytics tools to monitor user behavior and optimize app performance based on data insights.
- Managed to deliver regular updates to enhance features, maintain compatibility, and address user feedback.

Swing

05/2017 - 08/2020

Full Stack Developer

- Developed web applications using Angular, React, SailsJS, and NestJS, enabling dynamic content management and user interactivity.
- Designed and implemented secure backend systems using Node.js, Golang, and databases such as MongoDB, PostgreSQL, and Redis.
- Created and optimized frontend designs with modern UI frameworks, including Bulma, Ant Design, and Material UI.
- Built and maintained RESTful and GraphQL APIs to facilitate smooth data exchange between client and server.
- Enhanced application performance through code optimization, reducing load times and improving scalability.
- Integrated real-time communication features using WebSockets and Node.js for responsive user experiences.
- Ensured cross-browser compatibility and mobile responsiveness for all web applications.
- Performed regular code reviews and implemented testing strategies to ensure code quality and reliability.
- Participated in migrating legacy systems to modern architectures, ensuring compatibility and improved performance.
- Delivered feature updates and patches based on user feedback and evolving business requirements.

Experience	
Goals	04/2021 - 01/2022
Mobile Developer	
- Developed multiple mobile applications for iOS and Android platforms (using Flutter) that increased user engagement by 45% - Worked closely with design, product, and engineering teams to develop and deliver features at a rapid pace - Designed and developed a feature-rich mobile application from concept to deployment - Developed and maintained several mobile applications, ensuring code quality and app reliability - Developed user-friendly mobile interfaces and optimized them for multiple device sizes	
Bittunes	03/2021 - 02/2022
Software Developer	
- Designed and implemented a modern user-friendly interface for a large enterprise product. - Developed and maintained software solutions in accordance with coding standards and best practices. - Collaborated with other developers and stakeholders to ensure the successful completion of projects. - Assisted in debugging and troubleshooting existing applications. - Developed REST APIs and web applications using Node.js, React.js, and other modern technologies. - Utilized version control systems including Git to manage development projects.	
SmartX Accelerator	03/2021 - 11/2022
Technical Advisor	
- Acted as a technical advisor for multiple software development projects, providing guidance and troubleshooting support. - Assisted in migrating legacy systems to modern platforms, ensuring compatibility and reliability. - Developed and implemented technical solutions to address customer challenges and improve operational efficiency. - Collaborated with cross-functional teams to create innovative software solutions that cater to customer needs. - Monitored and maintained system performance, resolving any technical issues in a timely manner. - Created and managed system-level configurations for network, server, and workstation components. - Developed strategies for the integration of new technologies into existing systems and processes.	
Lingoberry	03/2021 - 03/2023
Software Architect	
- Designed and implemented a multi-tier software architecture for a large-scale web application. - Collaborated with software engineers and product managers to develop a unified architecture for a suite of product offerings. - Developed coding standards, guidelines, and best practices for software development. - Mentored and guided junior software engineers to ensure quality software and effective problem-solving. - Created architectural diagrams and documentation to facilitate knowledge transfer and product support. - Evaluated and integrated third-party software solutions to increase efficiency and performance.	

Projects	
ESR Machine Development	
Novin Gostar	
- Designed a diagnostic machine known as an ESR (Erythrocyte Sedimentation Rate) machine, widely used in hospitals and laboratories for critical diagnostic testing. - Built a tailored operating system to meet medical compliance standards and optimize performance. - Collaborated with hardware engineers and medical professionals to deliver a seamless solution. - Designed a diagnostic machine with embedded systems and advanced image processing, enhancing accuracy and reliability.	

Projects

Augmented Reality Web App

Iran Mine House

- Developed an AR application using pure JavaScript and AR.js to showcase company profiles and key information interactively.
- Implemented a feature allowing users to scan QR codes on visit cards, seamlessly linking to augmented reality views of company details.
- Designed the application for use at international events, including conferences in Dubai, to enhance networking and presentation experiences.
- Enhanced UI/UX to ensure a seamless, intuitive, and visually appealing user experience.

Awards

Best paper and presentation award

06/2023

The Global Interdisciplinary Green Cities Conference University of Augsburg,

<https://greencitiesconference.com/>

Awarded Best Presentation for my abstract paper titled "Improving Attention Stand-alone Process Program (ASPP) with Artificial Intelligence (AI)" The paper explored innovative AI-driven methods to improve productivity and focus in various tasks, showcasing impactful research and practical applications.

Sharif MPM

10/2020

<https://mpm.sharifict.ir/mpm8/>

Achieved 8th place in the prestigious Sharif Mobile Programming Marathon with a final score of **16.18**, narrowly behind the 1st place score of **16.6**. Successfully advanced through three stages of scoring and judging, showcasing strong problem-solving, teamwork, and mobile application development skills.

Education

Hamedan University of Tech

09/2019 - 01/2024

Computer Engineering

B.Sc.

3.8 GPA

Shahid Beheshti University

06/2020 - 05/2021

Computer Engineering

B.Sc

Honorably Graduated 4 terms as guest in SBU.
